

optima^{eco}

YOUR BEST CHOICE FOR CLASSIC CHENILLE YARN MACHINE!

Giesse Quality - Energy saving - Low Noise

PATENTED SYSTEM

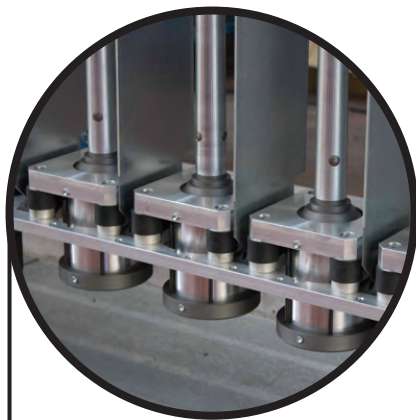

Giesse Quality - Energy saving

THE FIRST CHENILLE MACHINE WITH HIGHEST ENERGY EFFICIENCY AND LOWEST NOISE LEVEL

OPTIMAECO energy savings and quality means:

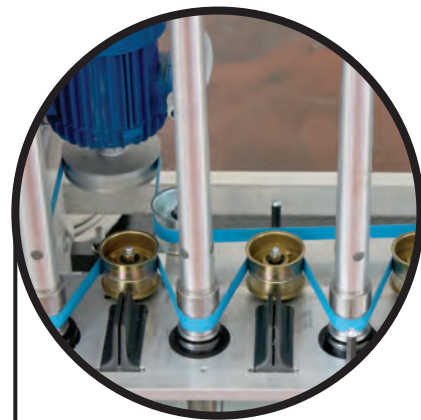

- Considerable less energy consumption that equals to considerable cost reduction
- Much Less noise by taking away belts, idlers and relevant bearings
- Environmental and safety costs reduction to comply with the required standards
- Constant speed of spindles at variation of load (beginning and end of cop)
- Exact same speed on all the spindles
- Mechanical execution with highest precision which drastically reduces maintenance and make adjustments easy (mistake-free system)
- Highest quality of chenille yarn with easiness of operations for ordinary and fine adjustments
- Possibility of applying for environmental improvement funds
- Guarantee of GIESSE quality of machines and service

NEW MOTORIZED SPINDLES SYSTEM

Up to 30% energy saving

*Tested: Nm 3 count – 9 mt./min production speed
Saving up to 50% of maintenance costs by clearing away pulleys, idlers, bearings and transmission belts.

CONVENTIONAL SYSTEM

More Energy cost day after day
More maintenance cost
Less precision
